WEST COAST RABBINICAL COURT OF BEVERLY HILLS.

BET DIN-Rabbi Gabriel Cohen Rav"D

This RABBINICAL COURT was founded in 1983 with the encouragement of the Chief Rabbis of Israel – Rav Ovadiah Yosef, Rav Mordechai Elyahu, and Rav Avraham Shapira. the services offered, TEUDAT RAVAKUT, MARRIAGE, COUNSELING including Gittin (Jewish Divorces). we help anyone in need, an Agunah or an Agun finalize his or her divorce anywhere in the world. For Ashkenazim we do an Ashkenazi Get, and with Sephardim we do a Sephardi Get as required by Halacha, certificate of Jewish status, certificate of marital status, translations from many languages, and replacement of lost, ruined or faulty Ketubot. CIRCUMCISION: By certified Mohalim banning the use of a clamp. FINANCIAL ARBITRATION: Only Rabbis who actually hear the case firsthand from the parties involved are consulted to advise on the decision of the Bet Din.

KASHRUT, With our Kashrut staff, we do local and national supervisions, implementing Sephardic and Ashkenazic restrictions..

MULTILINGUAL SERVICES: To help the diverse populations, we can render our services fluently in eight languages. CONVERSIONS: Only strictly sincere applicants who will commit to observe all the laws are considered.- PUBLICATIONS: With G-D's help we are in the midst of publishing a Sefer on Hilchot Gittin that deals with many contemporary issues, and republishing a Sefer on Hilchot Niddah in four major languages and a Sefer on Hilchot Pessah.

INTRODUCTION

One of the most meaningful events in Jewish History occurred about 3,300 years ago, when our ancestors were freed from slavery in Egypt. Pessah, the cornerstone of Jewish faith is replete with traditions and symbols with deep underlying meanings in order to remember this closeness with Hashem forever. this booklet is based on traditional original Sephardic customs. Many chumrot of the world Kashrut supervision follow Ashkenazic traditions , mainly Kitniyot and mixtures of Kitniyot, which Maran HaBet Yosef did not follow..

We hope you will find this booklet useful in your Pessah preparations. Our best wishes for a very happy and Kasher Pessah Holiday. The following psakim, were compiled according to the Sephardic tradition to their fullest detail following three leaders of our time: Rabbi Mordechai Elyahu ZT"L, Rabbi Ovadia Yosef ZT"L, and Rabbi Yitzhak Abadi Sh'lita. In case the view of your local Rabbi is different from the one presented here, you should follow your local Rabbi that may have a different Custom. If you have any comments, please send them, by Email bethdinorg@gmail.com

I would like to express my gratitude and appreciation to all my Rabbis and teachers mentioned above, to the Yeshiva of Beth Medrash Govoha, Lakewood, N.J, and especially to the Rosh Hayeshiva, Harav Hagaon Rabbi Shneur Kotler, ZT”L, I also thank my friends and colleagues whom I learn and work with daily. May the Almighty bless them and all their followers with long life, good health and happiness.

--Rabbi Gabriel Cohen

PREFACE TO KASHRUT OF PESSAH 5781

There are some new items in this list. To help avoid the Pessah expenses that keep rising and make it very hard to cope with, it is a mitzvah for every Rav that has proper knowledge of food products to guide his Kehila of what is permitted without a specific hechsher for Pessah and on the other hand avoid the foods that are not in the spirit of Pessah even if they are kosher for Pessah. Since they resemble chametz people might get confused and make the same product with wheat which is real chametz. For example: Pessah bagels, Pizza rolls, croutons, knishes and many more items that closely mimic the year-round baked foods: these should be avoided .

THE SPIRITUAL MEANING OF PESSAH

THE MONTH OF NISSAN

Our Master Moshe Rabenu instituted that we should begin to study the laws of each Holiday in its appropriate time. For Pessah that has so many complex laws we should start at least 30 days before. If not, then at least the week before.

During the whole month of Nissan, no Tachanunim are said to commemorate the Dedication of the Tabernacle (Mishkan), which took place on the first days of Nissan. Neither do we say Tzidkatecha in Mincha of Shabbat. No fasting is allowed during this month, except for fasting to annul a bad dream.

MAOT HITTIM -It refers to the Mitzva of helping the poor have food for Pessah, providing them with wine, Matzot and all other Pessah needs. It is a great Mitzvah for each Jew to see to the needs of any poor fellow men

SHABBAT HAGADOL- The Shabbat before Pessah is called Shabbat Hagadol,” The great Shabbat”, because of the great masses of people that used to gather to learn the laws of Pessah. Another reason is because miraculously the Egyptians did not harm the Jews, nor react when they saw the Jews preparing to slaughter their idol, the sheep. Also, a civil war broke out between the Egyptians firstborn against the population when they heard and believed that Hashem will kill the firstborn.

THE BLESSING ON THE FRUIT TREES-During the month of Nissan when we see blossoming fruit trees (at least two trees), we recite the Beracha: “Baruch Ata A. E. Melech Haolam, Shelo Hisser Beolamo Davar Ubara Bo Beriyot Tovot Ve’ilanot Tovim Lehanot Bahen Benei Adam”.

THE FAST OF THE FIRST-BORN-TA’ANIT BECHOROT -• Every first-born male is commanded to fast on the Eve of Pessah, including Kohanim and Levi'im, to thank Hashem for saving the Jewish firstborn. This fast continues until nightfall. • However, if a person partakes in a meal celebrating a Brit Mila, Pidyon Haben, a Sheva Berachot, or a Siyum (a completion of a whole Sefer), he may break his fast.

WHAT IS HAMETS-The Torah prohibits any products made with the five grains mixed with water, they become Hamets. The five grains are wheat, barley, rye, oats, and spelt. The prohibition extends to 3 prohibitions: • not eating Hamets • not deriving any pleasure from Hamets physically or financially •

not owning any Hamets during Pessah including not accepting any. If a person receives Hamets during Pessah he should refuse it and if it comes by mail, he should not bring it into the house. In addition, any mixture made during Pessah with Hamets even the least minute, even 1/1000th amount, it is Assur. If the mixture happened before Pessah, the Hamets is annulled in 1/60th.

Products that are “Kasher for Pessah” means those which do not contain any trace of Hamets.

CLEANING THE HOUSE AND PREPARING IT FOR PESSAH - LAWS OF BITUL - SEARCHING FOR HAMETS

On or before the 13th of Nissan, a person should clean the house thoroughly from any Hamets. The cleaning for Pessah includes rooms, closets, hidden areas and cracks where there could be Hamets. The Mitzvah to search for Hamets starts on the night of the 14th of Nissan, when the stars appear even before a late Arvit. A person should not get busy learning or eating at this time. If one forgot to check for Hamets on the night of the 14th of Nissan, one may do so on the 14th by day.

BEDIKAT HAMETS- It must be done in every place a person owns or rents, even in an office or a business. The search must be done in places where Hamets is likely to have been put, including wine cellars, attics, shops, closets cabinets clothes pockets, books (books that you need for Pessah) etc. One must search in all holes and crevices of walls as deeply as the hand can reach.

It is customary to hide ten small pieces of bread, wrapped in clear wrap, around the house in order for the search to have a goal and a reason to say the blessing.

Bedikat Hamets is performed by candlelight, or with strong and clear electric lights, but not a burning torch. Bedikat Hamets that is carried out by moonlight is not valid. The Beracha for the Bedikat Hamets is: “Baruch Ata Adonay E. lo/henu Melech Haolam Asher Kideshanu Bemitzvotav Vetzivanu Al Biur Hamets”. One Beracha is enough for carrying out Bedikat Hamets in various rooms or houses. If a person needs to check for Hamets earlier but within 30 days of Pessah, he could say the bracha.

BITUL - After Bedikat Hamets one must nullify all Hamets by saying, “Any leaven and Hamets which is in my possession, which I have not seen or eliminated, is hereby declared worthless as the dust of the earth”! And this is what he says (three times), in Aramaic, “Kal Chamira Vechamia De’ika Birshuti, Dela Chazite Udela Biarte, Udela Yadana Leh, Livtil Veleheve Ke’afra De’ara”. This may be said in any language. • The Hamets found during the search and any Hamets which will be eaten before the time of burning should be put safely away.

TRAVELING AWAY-If a person leaves home more than 30 days before Pessah and he is not returning during Pessah he does not need to make Bedikat Hamets. However, wherever he is he must do Bitul Hamets . If he travels within 30 days of Pessah, he must perform Bedikat Hamets. People that travel out of time zone should contact the Rabbi for a special sale of Hamets. It is permissible to eat Hamets up to about 10:30 A.M. on the 14th of Nissan, and then within the following hour it should be burnt.

GETTING RID OF THE HAMETS -The elimination of Hamets is done by burning it, (or by throwing it into the sea). After burning the Hamets, the following is declared:” “Any leaven or Hamets which may still be in my possession, which I have or have not seen which I have or have not destroyed, should be worthless as the dust of the ground”. “Kol Chamira Vechamia De’ika Birshuti, Dechazite Udela Chazite, Debiarte Udela Biarte, Livtil Uleheve Ke’afra De’Ara” • If Hamets is found during Hol Hamoed Pessah, it must be destroyed immediately. If it is a sizeable piece, the Beracha of Biur Hamets should be recited. If the Hamets is found on Yom Tov or Shabbat, it may not be touched, but should be covered until Hol Hamoed, when it must be burned.

It is assur to benefit from any amount of Hamets. This prohibition includes eating, selling, or even feeding an animal. Pots used during the year with Hamets cannot be used during Pessah and must be cleaned and put away until after Pessah. (see later that if a person needs to use any pot or utensil from the year, he must Kasherize it before Pessah. Books, Siddurim and Birkonim must also be put away if they might have some Hamets.

A NON-JEW’S HAMETS A non-Jew that brings his own Hamets into a Jew’s domain must make his own little space to eat and clean up immediately after. A Jew may not guard or take responsibility for any Non-Jew’s Hamets, during Pessah.

THE SELLING OF HAMETS - since it is prohibited to possess Hamets on Pessah, any Hamets left undisposed of, must be sold, or given to a non-Jew. This is not meant to be a fictitious sale, but a real business transaction. Since there are many legal intricacies involved in this sale, a rabbi acts as our agent both to sell the Hamets to the non-Jew on the morning before Pessah and to buy it back the evening after Pessah ends. Jewish law requires that our Hamets be sold by the specified time zone for the location in which the owner will be on the day before Pessah. NOTE: Hamets which remained in our ownership, possession, during Pessah, and not sold to a non-Jew, may not be used ever. You may buy Hamets after Pessah from supermarkets and drug stores which sold the Hamets. However, if you know that the Jewish

storekeepers did not sell the Hamets, you must wait a reasonable time until they sell out their Hamets, or buy from stores that are not Jewish owned.

NOTE: Hamets which was delivered to a Jewish store during Pessah may not be used after Pessah unless it was included in a previous sale of Hamets to a non-Jew.

Please read the list then send your detailed kashrut questions

to: bethdinorg@gmail.com please no phone calls.

Since a tremendous amount of research and clarification has been invested in this list,
please read the list and try to use only the items from this list.

No questions will be answered after March 22 2021

MATZA AND MATZA SHMURA -The Matzot we consume during Pessah, are made from the five grains. All Matza dough may not exceed 18 minutes from the second the flour is mixed with water till the Matza is completely baked. There is a special Mitzvah to eat Matza Shmura during the Seder night. Matza Shmura means that the wheat was supervised from the time of harvest from getting wet .

There are three levels of Matza: • 1-SHMURA The wheat was watched from the time of harvest. • 2-The wheat was watched from getting wet from the time of grinding and baked within 18 minutes of the

beginning. • 3-Watched only from the time the flour was initially mixed with water. This last one is usually the way the simple machine Kasher for Pessah Matza is made.

A person can find these same 3 levels in Machine Matza.

OAT MATZA - Not all poskim hold that oats matza is Hamotzi and they are not Mekayem mitzvat Matza on Pessach. Therefore it is misleading the tzibbur. It is advisable that the manufacturer writes that on the package. Some hold it is Shehakol or if in kernels, it is haadomo. It is maachal behema, animal food.

COOKING AND BAKING WITH MATZA KNOWN AS “GEBROCHT” -A Matza that has been wetted, cooked, fried, or made into baked items is called GEBROCHT. It is permitted for sefaradim.

Matsa mixtures are found in many foods. In that case, those that are strict to eat only Shmura Matza need to be strict and use foods that contain **ONLY** Shmura Matza meal flour only. This problem arises in Gefilte fish, cookies, cakes, and doughnuts as these products are often made with the simple Matza meal flour.

SEALED PRODUCTS- Anything that was used before is not to be used on Pessah. (i.e., open jar of peanut butter or avocado oil) – Everything must be opened new and fresh on Pessah.

MATZA ASHIRA AND EGG MATZOT -Matzot made with no water at all but only with real pure fruit juice (not concentrate mix) or eggs, are permitted. They may be eaten on Pessah, and surely by the sick and elderly. However, one cannot fulfill the mitzvah of Matza for the Seder night with it.

KITNIOT -Sephardim do eat kitniot.

Some have the custom to check Rice (three times) in order to ensure that there is no grain mixed with it. Due to the stringency of not eating Hamets on Pessah, for the Ashkenazim and some Sephardim a custom has been developed not to eat some Kitniot, legumes.

There are 3 reasons for this custom of not eating kitniot: • Since they were usually sold in bags next to each other, maybe some wheat or flour got mixed with the Kitniot. • Because when made as a cereal it looks like grain cereal. • It is possible to grind Kitniot and make a loaf similar looking to bread such as corn bread.

IN KITNIOT CUSTOMS, THERE ARE THREE LEVELS: • Those that permit all Kitniot. • Those that don't use rice, millet or any dried legumes but permit all fresh. • The Ashkenazim that don't consume any in any shape or form even in mixtures.

However the first two customs permit mixtures of Kitniot and surely its derivatives such as: corn syrup, oils, lecithin glucose and emulsifier, etc.. Legumes are permitted for most Sephardic Jews who, for various historical reasons, did not adopt this custom of refraining from Kitniot consumption on Pessah. Therefore Israeli or foreign Hechsherim for Pessah are found on candies, jams, mustard, and other products containing legumes. These products may be usable on Pessah by Sephardim.

However According to many opinions those that don't eat Kitniot, the mixtures are permitted even if the Kitniot are 51% of the mixture. That is why some supervising companies certify Kasher mixtures of corn syrup and legumes (including for Ashkenazim) they are correct for doing so to enhance the Pessah happiness and accommodate those that cannot afford the high-priced items for Pessah. “Hatorah hassa al mamonom shel yisrael” The Torah is careful not to waste the money of Bene Yisrael. During the years of wars, sicknesses and magefot, the Poskim permitted eating kitniot for Ashkenazim.

According to all opinions (including Ashkenazim) it is permitted to benefit from Kitniot and own them on Pessah and when necessary, babies and young children may even eat Kitniot.

For the Sephardim any food that is free of Hamets may be considered kosher. However, the Ashkenazim insist that all foods must be supervised in order to be kosher for Pessah. According to Maran Rav Ovadia Yosef ZT” L, we should not buy any products intended for Pessah without the approval of a Rabbi.

In all items where there is real and edible Hamets, meaning if in the ingredients there is wheat or any of the five grains, these foods should not be eaten on Pessah, even if the amount is minute and it is annulled in the one sixtieth formula before Pessah. Even though as a rule we don’t hold of Hozer veneor, but, since the Halacha of this Bitul is very complex, and they are beyond the scope of this booklet. All items containing Hamets that are not edible even by a dog, lose their status of Hamets. If the product is made before Pessah it is permitted, such as Play dough etc to use and keep.

LIST OF COMMONLY USED LEGUMES- KITNIOT

 lentils, tofu, , sunflower seeds, poppy seeds, kasha, kimmel, cumin, and lecithin rice, , millet.

The following are **NATURALLY-KASHER** -Meats, chicken, fish, fruits, fresh vegetables, etc. whether these products are bought specifically for Pessah or not, they can be washed/scrubbed before and used for Pessah.

RICE-SEE RICE BELOW

OILS: vegetable oil, corn oil peanut oil, almond oil , canola oil, olive oil, coconut oil, soy oil, soya oil, ,
 tofu oil, Pure Rice Bran Oil

VEGETABLES (FROZEN & FRESH) -Many vegetables may be used on Pessah. However Broccoli, Cauliflower, and Spinach have a different problem. They are often full of tiny bugs and are therefore very hard to clean even if they have a kosher sticker or say bug free they must be re-checked at home.

FRUITS AND VEGETABLES-It is preferred to buy fresh over frozen. However if it is hard to find the same quality in fresh, frozen may be used for Pessah . I s

MEDICATIONS -If medication is needed for a dangerously sick person then all medication is permitted. If not dangerously sick, the medications that contain only Kitniot are permitted. If the medications contain wheat, it might be permitted in specific circumstances, (The condition “Ahsheveh” is only applicable to make non edible food into food, but not to make the food Assour for Pessah).An adult should refrain from consuming sweet tasting medicines.

VINEGAR -Apple cider vinegar, Apple vinegar, synthetic vinegar, distilled vinegar are all OK. However, wine vinegar and red vinegar are not kosher unless it says it is Kosher LePessah. White distilled vinegar is made from corn and is permitted for Pessah. Distilled Vinegar in products such as Heinz ketchup, Best Foods or Hellman’s mayonnaise, French’s mustard and Claussens pickles, is synthetic vinegar and not from grain. However, when in doubt, contact the manufacturer or buy it with the Kosher for Pessah symbol.

GELATIN-Gelatin made from non-Kasher animal sources is not readily found certified for year-round use. However, the OU Certificate was awarded to pharmaceutical companies and nutraceuticals for the growing number of health-conscious kasher consumers.

The D on KASHRUT labels. -The “D” in Kashrut certifications as in OU-D or an OK-D usually indicates dairy equipment. However, if it contains dairy ingredients the product may not be eaten with meat nor cooked in meat utensils. Nevertheless according to most Poskim, dairy equipment is not a problem for whether one keeps or doesn’t keep Chalav Yisrael.

PROCESSED PRODUCTS – all products including vitamins and medicines should be bought before Pessah.

PRODUCTS IN STORES -We have found that stores often mistakenly place the NON-PESSAH Kasher foods in the “Pessah” section of the freezer. So please be careful.

FROG IN CHECKED LETTUCE WITH FOUR HASHGACHOT

THIS EXPLAINS WHY I ADVISE PEOPLE SHOULD BUY FRESH LETTUCE AND CHECK AT HOME

THE EVE OF PESSAH

- All Hamets must be eliminated, (around 10:30 a.m.). All Hamets dishes must be cleaned and put away. The house must be swept, one's pockets searched for crumbs, and all remaining Hamets (including the ten pieces of bread found during Bedikat Hamets) must be burned.
- Preparations for Yom Tov start, with all delicacies in honor of the arrival of Yom Tov, just as for Shabbat.
- One must examine carefully each leaf of lettuce used for Maror in the Seder (as well as all year round), to ensure that there are no bugs in it.
- From midday of Erev Pessah onwards, we refrain from any kind of work forbidden during Hol Hamoed.
- Hair and fingernails should be cut before noon. If one forgot, it may still be done after noon.
- In order to have an appetite for the Mitzvah of Matza, it is forbidden on Erev Pessah to eat Matza which will be used at the seder. Only Matza Ashira is permitted. Two hours before sunset one should refrain from eating any type of Matza.
- The Seder table should be set before the men go to the Arvit prayer.
- When buying meat, one should not express himself by saying that this is for Pessah, but say for the festival (Moed).
- People who are very stringent about keeping Mitzvot bake the Matzot for the Seder on Erev Pessah afternoon, as the Matza eaten in the evening is in memory of the Pessah offering brought in the Bet Hamikdash at this time. For this reason, festive clothes are worn and Hallel sung while the Matzot are being baked. Since at this time the eating of Hamets is already forbidden, great care must be taken that the dough does not ferment. A person should say he is annulling any dough that might become Hamets.

KASHERING UTENSILS

The laws of kashering are many and varied, and very controversial. It is of course best to use dishes and utensils especially set aside for Pessah use. Pots used during the year with Hamets cannot be used for Pessah .if you need those pots... you may kasher them before Pessah.

under certain conditions, some of the utensils used throughout the year may also be used on Pessah if they are Kashered and prepared in a special manner for Pessah use. New and old utensils purchased from a gentile, need Tevila after all Kashering. Kashering can be very complex at times. It is recommended that when Kashering you consult a Rabbinic authority.

A vessel becomes unfit for Pessah use because of the Hamets absorbed in it in one of four ways:

- If Hamets was roasted, Barbequed or baked on it without any liquid.
- If Hamets was cooked with liquid in

the vessel. • If Hamets sat in a vessel for a longer period than 24 hours. • If sharp Hamets sat in a vessel (for twenty minutes or more), or a knife that was used with sharp Hamets. for Ashkenazim, glass becomes unfit for Pessah only if it was used for hot Hamets during the year.

PRINCIPLES OF KASHERING

• Hamets is extracted from a vessel in the same manner that it was absorbed by it; therefore the method of kashering is determined by the way it is mostly used.

The Kashering should be done no later than the specified time usually by 10:30 AM on the morning before Pessah. • If a person needs to kasher dishes after that time, it can only be done through the strict methods of Kashering • Once Pessah begins, it can be done only through Libbun, torching.

THE TWO MAIN WAYS TO KASHER

Hagalah (purging): Done on any utensil used with hot liquids. We insert the vessel into a large pot that has boiling water. A good idea is to put some sand or ashes in the boiling water to defile the taste of any food residues. If after Hagalah the water became very dirty, the water would be changed. When doing Hagalah the water must be constantly bubbling on the fire, while immersing every item.

49

Leebun, torching: Done on items that were used directly with fire without any liquid involved. In Leebun you actually blowtorch or burn any particles of foods. Some vessels need to get very hot and some need to get to a glowing hot fire stage.

BASIC RULES FOR PREPARING AND KASHERING FOR PESSAH

• All utensils and vessels that will be used for Pessah must be thoroughly washed and scrubbed with soap. NOTE: EVERYTIME WE SAY WASHING, WE MEAN SCRUBBING WITH SOAP AND NOT PLAIN RINSING. • When there are bends, cracks, deep cuts and spaces in these utensils, care must be taken to reach inside these areas. • Kashering: All items with which only cold Hamets came in contact during the year, such as refrigerators and pantry shelves, should be thoroughly washed and rinsed to ready them for Pessah use. All items with which hot Hamets came into contact during the year, must, in addition, be kashered in the different required manners of kashering as explained by each item. • The way to kasher an item is by first cleaning, removing any dirt, rust, or any surface material, then wait 24 hours prior to the Hagalah. Note: Even if the vessel is prepared through only washing one should wait twenty four hours prior to using it on Pessah. • There is no Beracha (blessing) on Hagalah. • Boil water in a pot, which had not been used for twenty-four hours. This large pot used for Kashering may be from year round use for meat or dairy to kasher meat or dairy. Vessels that cannot be washed thoroughly cannot be kashered through Hagalah, only through Leebun. A vessel that can be kashered through Hagalah can surely be kashered through Leebun. • Any vessel that might get ruined when immersed in boiling water, such as vessels that are made from glued pieces or plastic or extra fine china cannot be kashered.

Question: “In regards to kashering blenders and food processors, you mentioned that if they were used for hot foods that include Hamets, they should be kashered by Hagalah. Is this the same procedure for foods that had only cold Hamets (i.e.: bread crumbs)?”

Answer: It needs hagalah

BRACES, DENTURES, BITE PLATES AND RETAINERS They should be brushed thoroughly before Pessah before the Hamets becomes Assur.

CHINA AND BONEWARE

• Fine “China” can be kashered by Hagalah. • It can also be kashered by pouring boiling water up on it, taking care to cover all areas with the boiling water. Then, rinse with cold water.

COUNTERS AND TABLES

Counters and tables are first thoroughly scrubbed, including the surfaces and the cracks between the different sections. We then pour boiling water upon them. However if the table is used only with a tablecloth throughout Pessah, it only needs to be cleaned thoroughly. High chairs are thoroughly scrubbed. You can kasher granite countertops, even with a synthetic finish. The proper method to kasher the counter is irui kli rishon (pouring boiling water over the surface of the counter). A steamer can be used to kasher counters provided that the counter is being kashered with actual water, not vapor, and the water is at or near the boiling point of 212F. Q: Is it OK to pour boiling water over GLAZED counter to kasher for Pessah? A: Yes

Tables that are covered with table cloths or place mats . dont need any aluminum covers under the table cloth.

CUTTING BOARDS

A wooden cutting board need only be washed since hot foods are not normally placed upon the cutting board. But if hot foods are placed upon it, then it requires Hagalah. If the board is too large for Hagalah, then clean it, pour boiling water upon it, and rinse with cold water.

EARTHENWARE

All utensils and vessels made from earthenware cannot be kashered. A stone oven may be kashered by torching it or burning it extra hot.

ELECTRICAL APPLIANCES

Refrigerators, freezers, coffee makers, water coolers, percolators, Fruit juicers and thermoses may be kashered for Pessah by only thoroughly cleaning them. A dishwasher needs kashering by thoroughly cleaning it as well as its racks and all intricate parts. Then run the hottest cycle on empty.

GLASS AND PYREX

- Glass items, colored or clear, such as pots, glasse s, dishes and cups can be washed thoroughly and used on Pessah. Since glass does not absorb Hamets, no Hagalah is necessary.
- Glass with painted designs not on the inside of the item (i.e. the area which touches the food) can be prepared for Pessah.
- Items made of special glass, scuttle as Pyrex or Co rning ware, which are normally used directly upon the fire, can be prepared for Pessah. As with ordinary glass, there is no need to Kasher Pyrex and Corning ware. If they are clean, they may be used on Pessah.
- Some Pyrex items have a metal base, which is separa te from the Pyrex. This base holds no food. Since the metal base normally does not touch the food, it need not be kashered, just cleaned.
- Corelle can be prepared for Pessah. The laws, which apply to glass, also apply to Corelle. NOTE: For Ashkenazim who hold that glass absorbs is considered unfit for hot Hamets the food, only glass that was used for Pessah use by Kashering. There are Poskim that are of the opinion that while glass used for cold must be kashered by immersing them in cold water for 72 hours-with fresh water every 24 hours. If it is used with hot it may not be kashered.

OVENS

- Gas and electric ovens can be kashered for Pessah. Clean the oven and all racks thoroughly, as well as the broiler, with oven cleaner, then, turn it to the highest setting, and allow to burn for one hour.
- A “self-cleaning” oven can be kashered for Pessah. Set it on the “self-cleaning” setting and allow it to complete its self-cleaning cycle.
- A toaster-oven can be kashered for Pessah. Clean it very thoroughly from any crumbs and other matter. Then, set it on the highest setting for one hour.
- A Microwave Oven can be kashered by cleaning it thoroughly, then

placing a cup of water inside it, and turning it on till some evaporation happens, • Electric Plates, Hot plates: They should be washed thoroughly and turned on for one hour.

KASHERING OF POTS

All pots including Pressure cookers are kashered by the process known as Hagalah (purging). • Take the pot to be kashered, and clean it thoroughly. • Boil water in a second pot, which is large enough to contain the pot to be kashered. Like the first pot, the second pot must not have been used within twenty-four hours. • Once the water boils, immerse the first pot into it, until first pot is completely covered by the boiling water. Note: the handle must also be immersed. If this cannot be accomplished in one step because it is too large then immerse one portion of the pot, remove it from the water, and immerse the other side. Leave it in the water for a few seconds • Rinse the Kashered pot in cold water immediately following Hagalah.

Covers of pots must be kashered for Pessah after they are clean including the areas under and around the cover handle and under and around any screws, bolts, etc. If necessary, detach these parts from the cover, clean. Replace before Hagalah. By Pressure cookers the rubber must be cleaned thoroughly. If it is hard to clean certain areas, then pour bleach or a similar cleaning agent upon the area that cannot be cleaned. Then, any food lodged there is rendered inedible, and is thus no longer prohibited as Hamets. Then, proceed with the Hagalah. Note: If tongs are used to hold the article being Kashered, then the article should be released while it is being immersed.

For a very large pot, which is too large to be placed within a second pot, proceed as follows: • Boil water in this large pot to be Kashered, filling it as close to the top as possible. Once the water boils, cover the pot completely with a flat cover (it need not be the cover of this particular pot). Allow the water to boil for thirty seconds while the pot is covered. (Caution: in gas

53

range, overflowing water may extinguish fire). After pouring out the boiling water, immerse the pot handle in a second pot of boiling water. • the entire pot in cold water immediately following the Hagalah. Rinse • There is an alternate method for kashering metal pots for Pessah which is, clean them thoroughly. Then place them (empty) in the oven at a high setting for half an-hour. Wine goblets, napkin rings, candlesticks, jewelry such as rings worn during kneading doughs, can be kashered by just washing them thoroughly.

Sieves and strainers must be kashered if they were used with hot foods. Extreme care must be taken to clean them thoroughly prior to the Hagalah. Note: Sifters should not be kashered, since they cannot be cleaned thoroughly.

ROASTERS, PARTS AND RACKS

Roasters, metal or enamel, oven racks and metal baking pans are normally used inside the oven. They cannot be kashered by Hagalah. Rather, they should be cleaned thoroughly, and then placed (empty) in the oven at the highest temperature for one hour. For convenience, this may be done at the same time the oven is being kashered. Frying pans, including Teflon coated, may be kashered the same way as oven racks. Clean them thoroughly, and then leave them in the oven for one hour at the highest setting.

SILVERWARE (OR GOLDWARE)

Hagalah can kasher silverware. Place a net inside the pot and immerse each piece of silverware in the boiling water taking care that the water covers each piece completely. Then the whole net is removed and placed in cold water. Or individually tie the pieces to a string one after the other. Drop into the boiling water and remove the whole string shortly after. Rinse the silverware in cold water immediately following the Hagalah.

Two or more pieces of silverware may be left in the pot together as long as they are dropped into the boiling water separately. "Meat" silverware can be Kasherred in a "dairy" pot, and vice versa. But remember that both the silverware and the pot must not have been used for twenty-four hours prior to the Hagalah. Meat and dairy silverware may be left in the pot at the same time, but remember to drop them separately into the pot with boiling water. If on the silverware there are hard to clean areas, like deep designs, cracks around the handle, etc. Then, pour bleach or a similar agent upon the area, which cannot be cleaned. Then, any food lodged there is rendered inedible, and is thus no longer prohibited as Hamets. Then, proceed with the Hagalah. The pot used for Kashering (i.e. the pot in which the items to be Kasherred will be immersed) may be either a Pessah pot or a pot which had been used for Hamets.

SINKS

A sink requires Kashering for Pessah. After cleaning it, pour boiling water over the entire sink (this applies to enamel, porcelain or metal sinks). If any area cannot be cleaned thoroughly (such as the area near the rim), pour bleach upon it, to render any food lodged there inedible first, then pour boiling water over it. It does not need covering with contact paper. Faucets should be cleaned thoroughly.

STOVES, RANGES, AND GRATES

The burner of a stove and metal grates upon which pots are placed for cooking, may be kasherred simply by cleaning them. Since any food, which may have fallen on them, is immediately burned. If the section between the burners is enamel or metal, it must be covered with aluminum foil. However Corning ware tops, such as on electric ranges, are treated like ordinary glass and only need to be thoroughly scrubbed. Knobs should be only washed.

TABLECLOTHS, NAPKINS

Cloth tablecloths (not plastic) and towels used year round should be washed thoroughly and may then be used for Pessah.

TUPPERWARE

Tupperware and similar plastic storage containers that have been used with hot foods can be kasherred with Hagalah. Containers which were used only with cold solids may be used by just cleaning them. If, however, they were used with liquids which may have been Hamets (such as vinegar), then they should be Kasherred by Hagalah, even if all liquids used had been cold.

A blender must be kasherred by Hagalah if it was used for hot foods that include Hamets. Before Hagalah, extreme care must be taken to clean blades and all parts thoroughly.

A food processor must be kasherred by Hagalah if it was used for hot foods that include Hamets. It should be noted, however, that most food processors have intricate parts, and are very difficult to clean. If dismantling is necessary for thorough cleaning, then this should be done. A Kitchenaid mixer or similar must be kasherred by hagalah, if it was used with hot foods that include Hamets. Then all parts, which touch the food, should be Kasherred by hagalah. But extreme care must be taken to clean all areas of the mixer thoroughly, especially areas above the bowl. If dismantling is necessary for thorough cleaning, it should be done.

FAUCET AND AERATORS Don't need any special kashering

WOOD, PLASTIC AND RUBBER

- Wooden, plastic or rubber items, such as spatulas, mixing spoons, rubber gloves, bowls, corian and granorex, can be kasherred for Pessah by hagalah. (Follow the steps listed for silverware). However, if these items were generally used only for cold foods, then they need only be cleaned thoroughly.
- Melmac dishes can be kasherred by hagalah.
- Plastic or metal graters can be prepared for Pessah if they were not generally used with hot, spicy or sharp foods. Then they need only be cleaned thoroughly. But

extreme care must be taken in cleaning them. If they were used with hot Hamets, it is preferable to get a new one.

TEVILA

- Tevila of dishes is a means of purifying them by dipping them completely in a Mikva (ritual bath), which contains a minimum of 360 liters of natural water not retrieved into a vessel. They may also be dipped in a sea or river. Tevila of vessels may not take place on Shabbat or Yom Tov.
- If the dishes are not new, they first require haga lah or Leebun as required, and then Tevila.
- When dipping the vessels in the water, one says the Beracha:

56

“Baruch... Asher Kideshanu... Al Tevilat Kelim”:

- Plastic, wooden or disposable vessels do not require Tevila.
- Renovated vessels by a non-Jew with a new metal coating do not require Hagalah, rather they must be cleaned well and then Tevila is done without a Beracha.
- All Vessels and utensils that are used directly to prepare to eat from or to store, and come in contact with food, requires Tevila. A new mincer or grater requires Tevila.

THE WHEAT AND THE BAKING OF THE MATZOT

- The flour for baking Matzot may be from any of the five grains: wheat, barley, spelt, rye or oats. However, usually wheat flour is used, as this is the best.
- The grain for the Matzot must be watched from the time it is harvested. The wheat must be cut before the kernels of grain lose their green color.
- Wormy grains should not be used.
- The bags of cut wheat may not be left in a damp place or lying on top of fresh grass.

GRINDING THE WHEAT

- The mill must be thoroughly cleaned before grinding the flour for Matzot.
- G-d fearing people must supervise the cleaning of the mill. The mill is cleaned and burned with hot coals. The first batch of wheat milled after the cleaning is not used for Pessah.
- In very difficult situations, the mill may be used without prior cleaning.
- The flour must be ground at least 24 hours before Pessah because, if not, the flour would still be hot and this could cause the dough to ferment. If, however, they were baked with freshly ground wheat, they are permitted for use.

THE WATER USED FOR MATZOT

The Matza dough must be kneaded with water, which was prepared at least 12 hours beforehand, and had been kept in-covered earthenware containers in room temperature. The water may be taken from a well, fountain or river. It should be poured into containers at sunset, and remain there overnight to become cool. When pouring the water, one should say: “We are preparing this water for the Mitzvah of baking Matzot”.

THE MATZA DOUGH

- First the flour is poured loosely into a receptacle which holds at least the minimum amount required to separate Challah from it, i.e. almost 2 kg. Care should be taken not to add more flour than the prescribed amount, since it becomes much more difficult to knead the dough, and thereby, the risk of it becoming Hamets increases.
- No salt whatsoever may be added to the dough. The dough is distributed among the various workers, who work on the dough uninterruptedly (to avoid fermentation) until the Matza is shaped. Matzot are spread out thin and perforated to prevent them from rising in the oven. Finally they are placed in the oven to bake.
- If the dough is too dry, water may be added. If the dough is too soft, flour may not be added in order to harden it.
- If one's hands become warm during the kneading process, one should cool them off before continuing the work.
- The kneading should not take place in a room where sunshine penetrates, nor near a window, even if there is no sunshine. It should neither take place near the oven nor other fire, to avoid contact with heat.
- All the utensils used for the preparation of the Matzot

(bowls, knives, tables, rolling pins, etc.) must be in perfect condition, without dents or holes, to avoid dough becoming stuck in them and fermenting. Every 18 minutes, all utensils are thoroughly cleaned, and fresh dough is kneaded.

THE OVEN

- If one wishes to use a HAMETS oven for the baking of Matzot, a large flame, whose heat must reach all parts of the oven, must be applied first

for one hour. Then one waits until all the flames are extinguished and the oven has cooled down, before lighting it again for the baking of the Matzot. •

BAKING THE MATZOT

The Matzot must be examined to ascertain that they are baked thoroughly. When breaking up a Matza, no “threads” of dough may be noticed. A Matza may not be returned to the oven for more baking. If a Matza became folded while baking, the double part may not be baked properly, therefore all the double dough must be disposed of.

PRODUCTION OF MACHINE-MATZOT

As the production of machine Matzot is done mechanically, great quantities of Matzot are produced within a limited time. The machines should be cleaned and washed adequately every 18 minutes.

Complicated equipment is employed and there are numerous Halachic problems which most bakers ignore. Without thorough supervision there is a considerable risk of Hamets in machine Matzot.

MATZA ASHIRA

- Matza Ashira is the term given for Matza that is kneaded with fruit juice, wine or eggs. When such Matzot are baked, care must be taken that no water whatsoever is added. • Matza Ashira does not fulfill the Mitzvah of Matza at the Seder. On the other days of Pessah, Matza Ashira may be used. •

LAWS CONCERNING THE SEDER NIGHT

On leaving the Synagogue after the Arvit prayer on the first Pessah night, we return home to begin the Seder, without delay and in an atmosphere of great joy. Everyone must keep the Mitzvot of the night - to eat matza 3 times throughout the Seder EACH within a prescribed length of time and to drink 4 cups of wine or grape juice within a prescribed length of time. The Matza, wine, and grape juice must be kosher.
